Subject Petition

I suggest that the petition have an explanation of a "small business" and a check off box (maybe in the other information about debtor section). Since small businesses have different time frames under chapter 11 and also a different issue under § 362(n), it would be helpful to the judge and others to know if a particular case falls under the small business category. It will also be helpful to the debtor to have to address that issue at the beginning of the case.
