Note: Due to a change in methodology, numbers for years prior to 2015 may not match numbers previously published in this table. Prior to 2000, civil median disposition time intervals were rounded to whole months. Beginning in March 2012, for criminal defendants, the median time interval is computed from the proceeding date for a defendant (e.g., the date an indictment or information was filed) to the date on which the defendant was found not guilty or was sentenced. Previously, the median time interval was computed beginning with the defendant's filing date. Therefore, data for criminal defendants for March 2012 and thereafter are not comparable to data for previous periods.

<sup>1</sup> Twelve-month period ending June 30.
